

Download Adhd Attention Deficit Hyperactivity Disorder In Children And Adults

Attention deficit hyperactivity disorder (ADHD) is a behavioural disorder that includes symptoms such as inattentiveness, hyperactivity and impulsiveness. Symptoms of ADHD tend to be noticed at an early age and may become more noticeable when a child's circumstances change, such as when they start school. Attention deficit hyperactivity disorder predominantly inattentive (ADHD-PI or ADHD-I), is one of the three presentations of attention deficit hyperactivity disorder (ADHD). It was formerly known as attention deficit disorder (without hyperactivity), but the term was formally changed in 1994 in the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV). Symptoms. Some people with ADHD have fewer symptoms as they age, but some adults continue to have major symptoms that interfere with daily functioning. The symptoms of attention deficit hyperactivity disorder (ADHD) can be categorised into 2 types of behavioural problems: inattentiveness, and hyperactivity and impulsiveness.
