

Download Advanced Techniques In Biological Electron Microscopy Ii Specific Ultrastructural Probes

The 19th International Microscopy Congress Organising Committee are pleased to announce the following speakers have confirmed their participation at the Congress. Jacob et al. differentiate human pluripotent stem cells (PSCs) into type II alveolar cells (iAEC2s). They find that iAEC2s display many of the functions, transcriptomic features, and surfactant-processing capacities that characterize primary cells. Finally, they derive AEC2s from gene-edited, patient-specific PSCs to model surfactant protein B ... Type or paste a DOI name into the text box. Click Go.
