Team Foundation Server (TFS) is one of the widely used ALM suites from Microsoft. TFS suite includes different components to address the ALM features like Application tier, data store, build services, and so on. Hi, I am in the process of choosing a project management tool which does the following, – Agile features (Backlog, Sprint/Iteration, User story management, Burndown charts, reports, Task management, Progress tracking etc). New content for this edition includes how Change Management increases buy-in, using Scrum to manage agile software projects, product development lessons from Stage-Gate and Lean Startup, and a case study on Enterprise Project Management. Enterprises across the globe rely on Perforce as the foundation for successful DevOps.
