Frankenstein; or, The Modern Prometheus is a novel written by English author Mary Shelley (1797–1851) that tells the story of Victor Frankenstein, a young scientist who creates a hideous, sapient creature in an unorthodox scientific experiment. The Online Writing Lab (OWL) at Purdue University houses writing resources and instructional material, and we provide these as a free service of the Writing Lab at Purdue. COVER The cover illustration reimagines the monster first conjured in Mary Shelley's 1818 novel. Two centuries later, the story of how the fictional Dr. Frankenstein built a creature from scavenged body parts and unleashed it on the world has lost none of its power to unsettle, and Frankenstein has become a byword for scientific overreach. Mary Shelley was born Mary Wollstonecraft Godwin in Somers Town, London, in 1797. She was the second child of the feminist philosopher, educator, and writer Mary Wollstonecraft, and the first child of the philosopher, novelist, and journalist William Godwin.
