Buy Student Solutions Manual for Applied Linear Regression Models on Amazon.com FREE SHIPPING on qualified orders Instructor Solutions Manual to accompany Applied Linear regression Models, 3rd Edition / Applied Linear Statistical Models, 4th Edition [John Neter] on Amazon.com. *FREE* shipping on qualifying offers. Multicollinearity is when independent variables in a regression model are correlated. I explore its problems, testing your model for it, and solutions. To assess the correlation in this data I will call the `corr()` method of the Pandas DataFrame object. Chained to this `corr()` method call I can then select the column of interest ("meantempm") and again chain another method call `sort_values()` on the resulting Pandas Series object.
