Summary. Anders Skrondal is a Senior Scientist at the Division of Epidemiology, Norwegian Institute of Public Health and an Adjunct Professor of Psychometrics at the Centre for Educational Measurement, University of Oslo. A field of applied statistics of human research surveys, survey methodology studies the sampling of individual units from a population and associated techniques of survey data collection, such as questionnaire construction and methods for improving the number and accuracy of responses to surveys. In statistics, quality assurance, and survey methodology, sampling is the selection of a subset (a statistical sample) of individuals from within a statistical population to estimate characteristics of the whole population.
