Whenever I think of a useful photography tip, I always write it down for later. Most of them are forgettable, but a few are so important that I try to tell them to as many photographers as possible. Many readers of Digital Photography School see themselves as beginner photographers so we pulled together this photography tips and tutorials for beginners<sup>2</sup>. Look for a plain background. Choosing the right background is one of the biggest considerations for the angle to photograph your subject at. The better you can separate your subject from the background the more striking it would be. One of the three pillars of photography that can dramatically affect the look of your images is camera ISO (the other two being shutter speed and aperture).
