

# **Download Biofilms In The Dairy Industry**

Microbial adhesion to surfaces and the consequent biofilm formation has been documented in many different environments. Biofilms constitute a protected mode of growth that allows microorganisms to survive in hostile environments, being their physiology and behavior significantly different from their planktonic counterparts. About the Society. Founded in 1943, the Society of Dairy Technology (SDT) is at the forefront of the dairy and food industries. The Society is the recognised professional body fostering scientific and technological developments in the dairy industries of the United Kingdom and the Republic of Ireland.
