

Download Carbofuran And Wildlife Poisoning

Carbofuran is one of the most toxic carbamate pesticides. It is marketed under the trade names Furadan, by FMC Corporation and Curater, among several others. A pesticide poisoning occurs when chemicals intended to control a pest affect non-target organisms such as humans, wildlife, or bees. There are three types of pesticide poisoning. Illegal Persecution: a national disgrace. Scotland has a long dark history of raptor persecution and it continues to this day. Government body responsible for wildlife protection issues first license for Hen Harrier 'brood meddling' on grouse moors. Hen Harrier chicks and eggs will be removed from nests, reared in captivity and released but to what fate? (© Ian Newton) In a highly controversial move, that will be seen by many as the abject failure of the government ...
