The American Psychological Association published a revision of the Ethical Principles of Psychologists and Code of Conduct in 2002. This text, a companion to the 2002 text Ethical Issues in Clinical Neuropsychology by Bush and Drexler, presents the reader with common ethical challenges in neuropsychology. The first edition of the Textbook of Clinical Neuropsychology set a new standard in the field in its scope, breadth, and scholarship. The second edition comprises authoritative chapters that will both enlighten and challenge readers from across allied fields of neuroscience, whether novice, mid-level, or senior-level professionals. Hypnosis is a state of human consciousness involving focused attention and reduced peripheral awareness and an enhanced capacity to respond to suggestion. Russell A. Barkley, Ph.D., ABPP. Russell A.
