Here is a history of older questions and answers processed by "Ask the Physicist!". If you like my answer, please consider making a donation to help support this service. Euler's identity seems baffling: It emerges from a more general formula: Yowza -- we're relating an imaginary exponent to sine and cosine! And somehow plugging in π gives -1 ? With this post we begin a monthly discussion of The Cosmic Doctrine by Dion Fortune, which I consider the most important work of 20th century occult philosophy. There are three very serious problems with the orbiting mechanism of the space machines said to whiz around the Earth. These need to be incorporated within our "reality framework" to help us determine what is actually real and what is marketing.
