

# Download Chapter 38 Care For Patients With Diabetes And Hypoglycemia

Screening for and Diagnosis of Diabetes and Hyperglycemia in the Hospital Setting. A history of diabetes should be elicited in all patients admitted to hospital and, if present, should be clearly identified on the medical record. Type 2 diabetes not treated with insulin. For people with type 2 diabetes treated with healthy behaviour interventions, with or without noninsulin antihyperglycemic agents, the effectiveness and frequency of monitoring BG in improving glycemic control is less clear (23,24,38–47). Chapter 40. Nursing Care of Patients With Disorders of the Endocrine Pancreas. Multiple Choice Identify the choice that best completes the statement or answers the question. Chapter 7. Nursing Care of Patients Receiving Intravenous Therapy. Multiple Choice Identify the choice that best completes the statement or answers the question.
