EAR ANATOMY & STRUCTURE Ear Anatomy Lessons with Text, Images & Simulations. ANATOMY OF THE EAR - K. Kavanagh, Ear, Nose & Throat (ENT) Surgeon, Lake Cumberland Regional Hospital, Somerset, KY Multimedia Ear Anatomy Lessons (Text, Images & Simulations). Mammals (/ m ? ? m e ? l i ? / from Latin mamma "breast") are vertebrate animals constituting the class Mammalia, and characterized by the presence of mammary glands which in females produce milk for feeding (nursing) their young, a neocortex (a region of the brain), fur or hair, and three middle ear bones. Pathology (from the Ancient Greek roots of pathos (????), meaning "experience" or "suffering" and -logia (-????), "study of") is concerned mainly with the causal study of disease. Coping with chronic, rare, and invisible diseases and disorders (and disabilities) •
