

# Download Complex Chemistry Structure And Bonding Vol 57

In chemistry, an ionic compound is a chemical compound composed of ions held together by electrostatic forces termed ionic bonding. The compound is neutral overall, but consists of positively charged ions called cations and negatively charged ions called anions. In chemistry, an ester is a chemical compound derived from an acid (organic or inorganic) in which at least one  $\text{-OH}$  (hydroxyl) group is replaced by an  $\text{-O-alkyl}$  group. Usually, esters are derived from a carboxylic acid and an alcohol. Free review tutorials and interactive questions to help you learn school and university chemistry.
