

Download Data Visualization With D3 And Angularjs

This is a thoughtful, concise, easy-to-follow tutorial. I'm a relatively advanced developer and had already hacked my way into d3 and gotten into a little trouble before picking up this book. D3.js is a JavaScript library for manipulating documents based on data. It makes it easy to create interactive visualizations in the browser using SVG and HTML5. SVG (Scalable Vector Graphic) is a standard for describing two-dimensional vector graphics. Visualizing data with D3.js is a powerful library for creating data visualizations for the web. With it, you can create compelling visual presentations of your data while writing relatively little code.
