

Download Earth Science Earthquakes Answer Key

Answer Key Earthquake Webquest Worksheet. Use the websites below to answer the following questions about earthquakes. Read each page (it is only a few paragraphs each time) and then answer the questions. You may “make a copy” in the file menu to type your answers directly into a document, or print out this page and write in the answers. To preview this answer key, ... Earthquakes Answer Key. 1. A is an instrument that records earthquake waves. ... The point on Earth's surface directly above the location at which an earthquake begins is known as the ... An earthquake occurs when energy is suddenly released in the earth's lithosphere: the surface of the earth shakes because of this energy. When this energy is released, it creates seismic waves. Earthquakes can occur anywhere within Earth's crust, but most commonly occur along active plate boundaries. Earthquakes that occur intraplate (within plates) are usually caused by the reactivation of very old fault systems. Earthquakes can even be caused by human activities such as nuclear testing. <DocumentSelector><Library>Regional Plans, Reports and Strategies</Library><Group>Natural Resources Regional Plan</Group><Subgroup>Chapter â€¦ The Spirit Catches You and You Fall Down by Anne â€¦
