

Download Extracorporeal Life Support Organization Elso Guidelines

Registry Quality Committee. Registry Quality Committee will develop and refine tools and measures reported through the ELSO Quality Reporting Platform that will benchmark ELSO Member Centers performance to peer institutions. Guidelines that describe the indications and practice of ECMO are published by the Extracorporeal Life Support Organization (ELSO). Criteria for the initiation of ECMO vary by institution, but generally include acute severe cardiac or pulmonary failure that is potentially reversible and unresponsive to conventional management.

RESUMEN. Introducción. La hernia diafragmática congénita es un defecto estructural anatómico que permite el paso de estructuras abdominales hacia el tórax, con una consecuente morbilidad producida por serias complicaciones cardiopulmonares y una alta mortalidad perioperatoria.

ANCC Magnet Designation. In summer 2018, UF Health Shands hospitals and programs achieved a fourth-consecutive Magnet designation by the American Nurses Credentialing Center (ANCC) — the profession's top recognition for quality patient outcomes and nursing excellence.
