A daily weather forecast involves the work of thousands of observers and meteorologists all over the world, and the work of thousands of machines. Find all the weather maps, satellite and radar maps, weather conditions and explanations you're looking for. Weather is the state of the atmosphere, describing for example the degree to which it is hot or cold, wet or dry, calm or stormy, clear or cloudy. Most weather phenomena occur in the lowest level of the atmosphere, the troposphere, just below the stratosphere.
