Linear Systems, Fourier Transforms, and Optics [Jack D. Gaskill] on Amazon.com. *FREE* shipping on qualifying offers. A complete and balanced account of communication theory, providing an understanding of both Fourier analysis (and the concepts associated with linear systems) and the characterization of such systems by mathematical operators. Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light. Ocean Optics Web Book is a collaborative web-based book on optical oceanography. Resonetics is a leader in laser micro manufacturing for life sciences. Core capabilities include laser ablating, cutting, drilling, and welding.
