

Download Hearing Loss Advice That Can Make Living With Tinnitus Bearable

Thanks so much Dave for this. I come back to this site again and again and each time I do feel reassured. I have had this ETD issue for the last three years and every now and then like now it get worse.I have that sensation in both ears, and I thought I had hearing loss, but the audiogram shows that I am hearing "better than normal"... Still I have sometimes pain, fullness sensation and the feeling I am not hearing as well as before (specially in crowded places).Jan 18, 2012: Proof that something CAN be done! by: Sarinne It's unfortunate that at your initial diagnosis you were told that "nothing could be done"; and good for you for pursuing the issue until you found some relief!On November 23, I developed mild tinnitus. I've been hearing a constant sound in my head. The sound is a mid-pitched whistle or whine similar to what you hear through the wall when your neighbor is vacuuming.
