

# Download High And Dry Gardening With Cold Hardy Dryland Plants

Nold clearly has a lifetime of personal experience with high and dry gardening, but some of his advice seems restricted to his experience and/or corner of the West. Munstead Lavender. *Lavandula angustifolia* 'Munstead' Munstead is an English lavender that is hardy from zones 4 to 9. If you get reliable snow cover you can grow it in zone 3, as well. Many environmental problems face us today. Members of Echuca Landcare Group are working toward enhancing our local natural environment. Some of Echuca Landcare Group's projects are outlined on this page. Sweet Potato 'Purple Raven' UT *Ipomea batatas* Not to Norfolk Island, NT, SA, TAS or WA 'Purple Raven' is a hardy, attractive, colourful plant with vibrant, deep purple, lobed leaves, it is very useful as a groundcover.
