

Download Holt Biology Study Guide The Fossil Record

The term biology is derived from the Greek word *bios*, "life" and the suffix *-logia*, "study of." The Latin-language form of the term first appeared in 1736 when Swedish scientist Carl Linnaeus (Carl von Linné) used *biologi* in his *Bibliotheca botanica*. Ever wonder why birds and bees both have wings, even if they aren't related? This lesson will examine that question. In addition, it will define and explain convergent and divergent evolution and ...The Fossil Record. If I asked you to name five prehistoric animals in the next ten seconds, what would you say? Would you list the *Tyrannosaurus rex* or the woolly mammoth? By PETER OMMUNDSEN This page illustrates how CASE PROBLEMS can inspire students in an introductory college biology course to develop scientific reasoning skills.
