

# Download Human Genetic Biobanks In Asia

A call for global governance of biobanks Haidan Chen a & Tikki Pang b. a. College of Humanities and Development Studies, China Agricultural University, Beijing, China. NOTE: Overflow seating for this session is available in Room 32AB. 5/9:00 Variation across 141,456 human exomes and genomes reveals the spectrum of loss-of-function intolerance in human genes. Dignity is the right of a person to be valued and respected for their own sake, and to be treated ethically. It is of significance in morality, ethics, law and politics as an extension of the Enlightenment-era concepts of inherent, inalienable rights. With genetic predictors of a phenotypic trait, it is possible to select embryos during an in vitro fertilization process to increase or decrease that trait.
