

Download Human Skeletal System Lesson Plans

Note: The sites listed above will serve as a source of curricular content in the body's Skeletal System. For other resources in Science (e.g., curricular content in Earth Science, General Science, Life Science, or Physical Science), or for lesson plans and theme pages, click the "previous screen" button below. We break it down into systems--skeletal system, circulatory system, etc. For the skeletal system, one thing I do to show how important joints are, is to tape popsicle sticks to the fingers of the children's dominant hand so they can't bend their fingers. Did you know that human babies are born with more bones than an adult? Human babies have more than 270 bones. Human adults have 206 bones. What's the reason for the difference? Did you know there are over 200 bones in the human body? Learn more about the human skeletal system with this diagram and info sheet! Your child will learn the scientific names of the major bones in our body, and read a bit about the skeletal system.
