

Download Ib Maths Studies May 2016 Paper 1

Flipping Maths is a teaching method which allows students to study the lesson content for homework – and then to use the time in class to work through questions that would have usually been set for homework. This is the British International School Phuket's IB maths exploration (IA) page. This list is for SL and HL students – if you are doing a Maths Studies IA then go to this page instead. For students aged 3-19. IB programmes challenge students to excel in their studies, and encourage both personal and academic achievement. To request transcripts and certificates, please visit our information page. Having seen a few people put these together via Twitter, I decided to make one for my top set GCSE Maths students. 12 questions to do in 1 hour - they get to colour in a sector of the clock as they complete each one (and have it checked).
