

Download In A Solution The Substance Which Solute Dissolves

In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. The term aqueous solution is when one of the solvents is water. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. Solubility is the property of a solid, liquid or gaseous chemical substance called solute to dissolve in a solid, liquid or gaseous solvent. The solubility of a substance fundamentally depends on the physical and chemical properties of the solute and solvent as well as on temperature, pressure and presence of other chemicals (including changes ...Elements, Compounds and Mixtures. What is a Solution? A solid or a gas dissolved in a liquid is called a solution. A mixture of two miscible liquids is also called a solution. Making Solutions A simple solution is basically two substances that are evenly mixed together. One of them is called the solute and the other is the solvent.
