Excerpt: This book is written as an introductory text, meant for those with little or no experience with computers or information systems. While sometimes the descriptions can get a little bit technical Courses ISM 3011: Information Systems in Organizations. The goal of this course is to help students learn the disciplines within MIS and the various ways information systems are used within an organization The book had a lot of survey that helpful and sometimes fun to work on but the rest of the reading is a mess. The reading is tedious and dragging, there are tons of info in each chapter and not even a picture.
