

Download Jacquard Looms Harness Weaving

On the diagram to the right, the cards are fastened into a continuous chain(1) which passes over a square box. At each quarter rotation a new card is presented to the Jacquard head which represents one row. Weaving is done by intersecting the longitudinal threads, the warp, i.e. "that which is thrown across", with the transverse threads, the weft, i.e. "that which is woven". Joseph-Marie Jacquard. Joseph-Marie Jacquard was not the inventor of the programmable loom, as many people imagine, actually he created an attachment to the loom, which played a very important role not only in the textile industry, but also in development of other programmable machines, such as computers, for example the Analytical Engine of ... Little Weaver. The Little Weaver is our computerized table top loom, perfect for travelling, beginning computerized weaving or small sampling. The Little Weaver is small in footprint and big on possibilities!
