Representation 5 The main hypothesis advanced in this chapter is, in summary, as follows.

Kant is a representationalist, by which I mean that he holds that the immediate objects of ... Notre Dame Philosophical Reviews is an electronic, peer-reviewed journal that publishes timely reviews of scholarly philosophy books. This book is a study of the second-edition version of the "Transcendental Deduction" (the so-called "B-Deduction"), one of the most important and obscure sections of Kant's Critique of Pure Reason. Using a close analysis of the second-edition version of the 'Transcendental Deduction', Adam Dickerson discusses most of the key themes in Kant's theory of knowledge, including the nature of thought and representation, the notion of objectivity, and the way in which the mind structures our experience of the world.
