An automated process has detected links on this page on the local or global blacklist. If the links are appropriate you may request whitelisting by following these instructions; otherwise consider removing or replacing them with more appropriate links. In economics, a public good is a good that is both non-excludable and non-rivalrous in that individuals cannot be effectively excluded from use and where use by one individual does not reduce availability to others. This is in contrast to a common good which is non-excludable but is rivalrous to a certain degree.
