Sustainability is the process of maintaining change in a balanced environment, in which the exploitation of resources, the direction of investments, the orientation of technological development and institutional change are all in harmony and enhance both current and future potential to meet human needs and aspirations. For many in the field ...Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions. Unfortunately, soil has always been associated with “dirt”, whereas “culture”, emphasizing knowledge and appreciation of literature, arts, philosophy, and the development of humanist ideas, has been perceived to be superior to the provision of food, feed, fiber, and fuel to sustain the very existence of humankind. Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state.
