

# Download Most Intelligent Mammals Lab Answer Key

Intelligent design (ID) is a pseudoscientific argument for the existence of God, presented by its proponents as "an evidence-based scientific theory about life's origins". Most biologists have concluded that the proponents of intelligent design display either ignorance or deliberate misrepresentation of evolutionary science. Creationism, Evolutionism, and Intelligent Design are three of the major positions on the question of how we got here. What's the difference between these positions? Research lab revokes honorary titles for Nobel Prize-winning DNA scientist James Watson, who lost his job there in 2007 for expressing racist views
