

Download Neurological Regeneration

While the peripheral nervous system has an intrinsic ability for repair and regeneration, the central nervous system is, for the most part, incapable of self-repair and regeneration. There is currently no treatment for recovering human nerve function after injury to the central nervous system. This invaluable resource explores the regenerative potential of stem cells in the nervous system, with a focus on clinical applications. The expertly authored chapters discuss cell-based therapies for Neurological Regeneration, part of Springer's Stem Cells in Clinical Applications series, is essential reading for scientists, researchers, advanced students and clinicians working in stem cells, neurology, regenerative medicine or tissue engineering. Kaufen oder mieten Sie Neurological Regeneration als eTextbook und erhalten Sie sofortigen Zugriff.
