"The True Story of Volcanic Disaster at Galeras and Nevado Del Ruiz" is a gripping tale of human error and vanity. Bruce reports how Colombians relied heavily on American and European volcanologists for guidance and funding. This is three different stories, interwoven because that's how the world is; the mismanaged volcanic crisis at Colombia's Nevado del Ruiz in 1985, the totally avoidable deaths (largely of scientists) at the Colombian volcano Galeras in 1993, and finally the fallout in the scientific community. Victoria Bruce. Documenting the events surrounding the 1985 eruption of Nevado del Ruiz and the 1993 eruption of Galeras, both volcanoes in Colombia, Bruce reveals continuing controversy.
