

# Download Orphan Train 101 Amazing Facts

The peacock include three species of birds in the genera Pavo and Afropavo of the Phasianidae family, the pheasants and their allies. The two Asiatic species are the blue or Indian peafowl originally of the Indian subcontinent, and the green peafowl of Southeast Asia; the one African species is the Congo peafowl, native only to the Congo Basin. A camel is an even-toed ungulate in the genus Camelus that bears distinctive fatty deposits known as "humps" on its back. Camels have long been domesticated and, as livestock, they provide food (milk and meat) and textiles (fiber and felt from hair). Download The 700 Club!
