

Download Project Selection Under Uncertainty Dynamically Allocating Resources To Maximize Value

Search past ICEAA Workshop Proceedings in the table below and click the title to access the downloadable files. 2007-2017 Workshop Proceedings are available online. Successful development of Information Systems (IS) Projects has been a source of competitive advantage for many organizations. This paper proposes the Cost and Time Project Management Success – CTPMS, an essential measure in this context because projects must dynamically address cost and time success under an agreed scope. Project Name Description Labs Partners Funding; Project 1: Virtual Batteries: Develop a characterization methodology to quantify the capacity/availability of virtual storage resources through transactive control of building loads to deliver grid and other transactive services. Elections and Technology. The introduction of information and communications technologies (ICT) into the electoral process is generating both interest and concern among voters, as well as practitioners, across the globe.
