

Download Research Question Quantitative Example

Therefore, in order to know how to structure your quantitative research question, you need to start by selecting the type of quantitative research question you are trying to create: descriptive, comparative and/or relationship-based. Furthermore, since there is more than one type of quantitative research question that you can attempt to answer in a dissertation (i.e., descriptive research questions, comparative research questions and relationship-based research questions), we discuss each of these in this article. Qualitative research, sometimes also referred to as naturalistic inquiry, is a distinct field of research with its own research philosophy, theory and methodology. Quantitative research questions are generally used to set the scene for an entire study or industry report. For quantitative business research it is imperative that the research questions used allow your respondents to answer succinctly.
