

# Download Research Question Quantitative Study

How to structure quantitative research questions. There is no "one best way" to structure a quantitative research question. However, to create a well-structured quantitative research question, we recommend an approach that is based on four steps: (1) Choosing the type of quantitative research question you are trying to create (i.e., descriptive ...Furthermore, since there is more than one type of quantitative research question that you can attempt to answer in a dissertation (i.e., descriptive research questions, comparative research questions and relationship-based research questions), we discuss each of these in this article. A quantitative research question is usually followed by a hypothesis — this is a prediction of what we think our study will find; a statement that answers the initial speculative research question. In quantitative research, you usually work with at least two variables. Quantitative research questions are generally used to set the scene for an entire study or industry report. For quantitative business research it is imperative that the research questions used allow your respondents to answer succinctly.
