

Download Sacred Natural Sites Guidelines For Protected Area Managers

Social role. Protected areas may provide ecosystem services such as drinking water, carbon storage and soil stabilization; harbour sacred sites for different faith groups; and hold important gene reservoirs of value in medicine, agriculture and forestry. NOTE: The first version of Brazil's NBSAP (2016-2020) was submitted to the Secretariat on 31 August 2016 and focused on actions and commitments to be implemented by the Secretariat of Biodiversity located within the Ministry of Environment.
