

Download Selling Older Edition Textbooks

A textbook or coursebook is a manual of instruction in any branch of study. Textbooks are produced according to the demands of educational institutions. Find deep discounts on textbooks from thousands of booksellers in one place, including new, used and international edition textbooks. NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value—this format costs significantly less than a new textbook. I have seen a few comments/questions regarding what is included with this textbook. I am hoping I can clear up some confusion. I just received the "Human Anatomy & Physiology, Books a la Carte Plus MasteringA&P with eText -- Access Card Package (9th Edition)".
