Introduction to Object-Oriented Modeling and Simulation with OpenModelica (PDF format, 6.6 MB) - a more recent tutorial (2012) by Peter Fritzson Figure 1 focuses on control flow and does not model data, decisions, resources, and so forth. The control-flow perspective (modeling the ordering of activities) is often the backbone of a process model. A workflow management system (WfMS) is a software system for setting up, performing, and monitoring of a defined sequence of processes and tasks, with the broad goals of increasing productivity, reducing costs, becoming more agile, and improving information exchange within an organization. These systems may be process-centric or data-centric ... Vol.7, No.3, May, 2004. Mathematical and Natural Sciences.
