Insular biogeography or island biogeography is a field within biogeography that examines the factors that affect the species richness of isolated natural communities. Biogeography is the study of the distribution of species and ecosystems in geographic space and through geological time. Organisms and biological communities often vary in a regular fashion along geographic gradients of latitude, elevation, isolation and habitat area. Phytogeography is the branch of biogeography that studies the distribution of ... The extensive evidence in support of both fact and theory of evolution comes primarily from studies of the fossil record, molecular sequences, and comparative anatomy. *Energy Without Conscience* by David McDermott Hughes - Ebook download as PDF File (.pdf), Text File (.txt) or read book online.
