

Download Transforming Urban Transport

To help cities get the most out of Transit-Oriented Development, a new World Bank study recommends looking simultaneously at the “three values” (3V) of a neighborhood: transit connectivity, quality of the urban environment, and market potential. Citicene Landscape Architects create spaces and places for living. We enhance our Client's projects through our expertise, knowledge and experience to deliver outdoor environments that contribute positively as integral components of urban development. Beijing, China – “Transit-oriented development,” or TOD — creating well-designed, walkable communities around a mass transit system, with a dense mix of housing, retail, offices or other amenities — is an increasingly important urban form. Harvard GSD selects Herzog & de Meuron, Beyer Blinder Belle for transformative expansion of School’s Gund Hall. Project designed to advance School's commitment to cross-disciplinary collaboration and innovation Harvard University Graduate School of Design...
