

Download Ups Packing Fragile Items

We are trained in advanced packing techniques like block and brace, double box, and suspension; We can pack almost anything; We specialize in properly packing fragile and high-value items like artwork or electronics, and can package large or odd-shaped items such as golf clubs or sporting equipment. Packing peanuts and loose fill packaging materials are used to fill empty spaces in packages that contain lightweight, non-fragile items.

Original Manufacturer's Packaging The original manufacturer's packaging is usually designed for shipments on pallets instead of single-piece shipments. For UPS Worldwide Express Freight, the maximum size for export shipments varies based on the destination country. For international shipments, the maximum weight of a pallet may vary by destination or origin. Shipments that weight over 4,400 pounds require prior approval. I would suggest going to a UPS Store and have them help you pack your fragile item. They will have heavy duty boxes and the right packing material to protect your fragile item. They will have heavy duty boxes and the right packing material to protect your fragile item.
