

# Download What Is A Crystalloid Solution

Normal saline (NS) is the commonly used term for a solution of 0.9% w/v of NaCl, about 300 mOsm/L. Less commonly, this solution is referred to as physiological saline or isotonic saline, neither of which is technically accurate. CHAPTER 3 Intravenous Fluid Selection 21 GRIDLINE SET IN 1ST-PP TO INDICATE SAFE AREA; TO BE REMOVED AFTER 1ST-PP Hypertonic crystalloid—A crystalloid solution that has a higher concen- This article provides an overview of how fluid is normally distributed in the body, what types of fluids can be given to correct any fluid imbalances, and how to calculate the volume of fluid needed for each dehydrated patient. Multicenter, prospective, phase 3 randomized non-blinded interventional trial of fluid treatment strategies in the first 24 hours for patients with sepsis-induced hypotension.
