

Download Who Am I Endocrine System Answers

and reproduction. The endocrine system regulates how much of each hormone is released. This can depend on levels of hormones already in the blood, or on levels of other substances in the blood, like calcium. The endocrine system is the one subject that most students dread but it can also be the easiest to understand. Here's a small lesson. The endocrine system consists of a number of glands -- including the pineal gland, pituitary gland, thyroid gland, and adrenal gland -- that produce and secrete hormones that circulate within the body. The Human Anatomy and Physiology course is designed to introduce students pursuing careers in the allied health field to the anatomy and physiology of the human body.
