X Marks the Spot (On Location with The X-Files) is a reference book published by Arsenal Pulp Press in 1999. The book was written by Louisa Gradnitzer and Todd Pittson, who worked as location managers on the first five seasons of The X-Files television series. How to: fade acne marks, discoloration, sun spots, and melasma (naturally!) X Marks the Spot also includes plot synopses of the first five years, explicit descriptions of locations, and anecdotes about life on set and with the stars, all as seen through the eyes of location managers Todd Pittson and Louisa Gradnitzer, who chronicle their five-year journey through The X-Files. This book was an excellent read for myself, an X-Files fan and a resident of Vancouver. It expresses the love and dedication that all the X-Files crew members had for the show. Anyone who likes the X-Files will get a kick out of reading the various stories behind acquiring all the locations for the show. A synopsis of *every* episode shot in BC is given, making this a useful episode guide as well.
